ENVIRONMENTAL FEATURES

At Parade, we carry out a life cycle analysis to measure the environmental impact of each of our models: from the extraction of raw materials, manufacturing, use, logistics, right through to the end of the product's life. Our environmental impact calculators, developed in-house using ADEME's EMPREINTE® database, have been certified by AFNOR for textiles and validated by the Pôle Eco-conception* for footwear.

* The Pôle Eco-conception is the French national centre for eco-design and life-cycle performance. Its expertise is recognised nationally and internationally by ADEME, the French Ministry of the Environment, AFNOR, ISO and the UN-environment.

EXTRAS

- DRS SYSTEM 2 technology for shock wave dissipation
- BE-FLEX 2.0 technology for a flexible sole and maximum comfort
- VPS SYSTEM technology: supports the arch of the foot
- 3D MESH lining
- ESD
- Stitched front reinforcement
- Steel toe
- Steel plate
